SKILLS

- **Programming Languages:** Python, SQL, Bash, Java, JavaScript
- **Frameworks / Libraries:** GraphQL, pytest, Django, Flask
- **Cloud & Container Orchestration Tools:** AWS, Docker, Kubernetes, Helm, Terraform, Tilt, Kind, CircleCI
- **Misc:** Git, AWS, Linux, PostgreSQL, Keycloak, Grafana, Loki, Prometheus

EXPERIENCE

SONY AI, Remote   **April 2023 -**
Platform Engineer

- Working on the backend of a distributed MLOps platform used by hundreds of research scientists across multiple individual global teams. Extensive use of python, terraform, helm, and kubernetes
- As a member of a three-man backend team, I personally designed and implemented the following:
    - Python microservice to build local s3 index to efficiently query petabytes of experiment artifacts (AWS SQS)
    - Flask proxy deployed as a sidecar to hasura engine. Facilitates outdated client communication by translating old graphql queries to match new schema.
    - Admin cli/db tooling to allow team leads to start/stop experiments belonging to associated researchers
- Collaborating with a cross-functional team of engineers in the planning, presentation, and implementation of a substantial backend redesign, seamlessly integrating a new source of GPU compute within a strict deadline. Engaged closely with DevOps and backend engineers throughout the project.

HORIZON MEDIA, Remote   **Jan 2022 – April 2023**
Software Developer

- Worked with data scientists to build Django REST API utilizing polynomial regression to provide clients with accurate budget recommendations (Deployed using AWS ECS and AWS Lambda)
- Maintained and developed internal python libraries to streamline API calls to various advertising platforms
- Developed tools used to alert advertisers of improperly served ads (wrong location, suspended campaigns)
- Pioneered github actions usage to bring automated testing, linting, and deployment to our team's products.
- Normalized database and rewrote queries using Django ORM to make prototype code production-ready

ESTEE LAUDER COMPANIES, Remote   **Jun 2021 – Jan 2022**
QA Test Automation Engineer

- Manual and automated test execution and development of B2B site using taiko, lambdatest in an agile team of 5

INFOSYS, Remote   **Feb 2021 – Jan 2022**
Associate Developer

- Certified Infosys Java Developer, Certified in Java, Angular and Spring frameworks

MILLER & COMPANY LLP, Queens, NY   **Jul 2020 – Jan 2021**
Information Technology Engineer

- Developed Python scripts used for backup data management and data entry automation
- Created automated invoice building tool using Python and jinja2

EDUCATION

B.A. Computer Science, **Queens College,** Queens, NY   **2020**
